

## Marsden V-250:

A large, stainless steel wash-down weighing platform

The V-250 is a high capacity veterinary scale with a super-size base ideal for weighing countless types of animals including even the largest of dogs.

Keep regular check of your pets weight

The V-250 is a superbly designed scale with a super-size stainless steel base. This scale is suitable to weigh anything from domestic cats to even the largest

weigh anything from domestic cats to even the largest of dogs!

This scale is easy to keep hygienic due to the stainless steel top plate which can easily be wiped down. An optional rubber mat is available for safety and comfort of the animal. For further safety of the animal the platform is low profile at 50mm high, making it easier for animals to access.

### Quick and easy to use

To start using the scale simply press the power button and you are good to go. Powered by batteries this scale can be used anywhere within a surgery regardless of where the nearest plug socket is. An AC adaptor is also supplied for powering the scale when batteries are not in use or running low.

The V-250 has Tare function so any unwanted weight can be easily deducted from the overall weight reading. An accurate weight is also always guaranteed thanks to the Hold function, which displays a stable weight even when the animal on the scale is moving excessively.

### Built to last

The Marsden V-250 is robustly built and designed to stand the test of time. This scale is

Stainless steel top plate

backed by a full one year warranty.
